

Statement of Sound Engineering Practice

Pressure Equipment Directive 2014/68/EU

Classification of Inlet Check Valve Assembly

In regard to the pressure Equipment Directive 2014/68/EU, Red Seal Measurement has classified our **2-inch Inlet check valve assembly for LPG Meters** in accordance with article 13, Classification of Pressure Equipment. Products that fall at or below the limits specified in Article 4, section 1.(a)(ii) must be designed and manufactured in accordance with “**Sound Engineering Practice**”. This classification does not permit the issuance of a **Declaration of Conformance** but a statement that “**Sound Engineering Practice**” has been used in the design and manufacture of the products may be provided. The Red Seal Measurement products listed below are designed and manufactured in accordance with “**Sound Engineering Practice**”:

Conformity Assessment

Article 14, 2 of the pressure Directive does not provide a conformity category or module for “**Sound Engineering Practice**”.

However, Red Seal Measurement has in place a quality system that meets the requirements of Module H as evidenced by a **Declaration of Conformity** issued by a Notified body under the Pressure Directive.
